ABSTRACT

This project presents a **Career Guidance System** developed using Python and the Django framework to create a secure, efficient, and user-friendly platform for guiding students in their career decisions. The system connects four main entities—Student, Mentor, College, and Admin—through a centralized career guidance module that manages all interactions using a request–response mechanism. Students can send requests to explore career options, receive mentorship, and access academic opportunities, while mentors provide expert advice and respond with guidance based on skills, interests, and industry demands. Colleges contribute by sharing course details, programs, and placement information, helping students choose appropriate educational paths. Administrators oversee the entire system by monitoring activities, verifying mentor inputs and college data, and ensuring the authenticity and reliability of the information provided. The platform incorporates role-based access control, allowing each user type to interact through dedicated interfaces, ensuring smooth and secure communication. By utilizing Django's structured architecture, the system maintains scalability, clean code organization, and strong data management. This project aims to support students in making informed career choices by offering a trusted digital environment that integrates mentorship, academic resources, and administrative validation for transparency and effectiveness in the career guidance process.

ACKNOWLEDGEMENT

I consider it a privilege to express my sincere gratitude and respect to all those who guided and inspired me in the successful completion of this main-project work.

I convey my reverential salutation to **Almighty God**, for enabling me to take up and complete the main project successfully.

I would like to express my sincere thanks to **Dr. SAJITH K.S,**
Principal, ST. KURIAKOSE COLLEGE OF MANAGEMENT AND SCIENCE KURUPPAMPADY for providing the necessary infrastructure and support to complete this main-project work.

I would like to express my sincere thanks to **Ms. NISHA P. VARGHESE**, HOD, Department of Computer Applications, ST. KURIAKOSE COLLEGE OF MANAGEMENT AND SCIENCE KURUPPAMPADY for her valuable advice and support which have helped me greatly in the accomplishment of the main project.

I sincerely thank my project guide **Ms. GEENA KUNJU**, Assistant Professor, Department of Computer Applications ST. KURIAKOSE COLLEGE OF MANAGEMENT AND SCIENCE KURUPPAMPADY for her consistent guidance and inspiration throughout the period for the completion of this main project.

I want to thank all the teaching and non-teaching staff of ST. KURIAKOSE COLLEGE OF MANAGEMENT AND SCIENCE KURUPPAMPADY for their valuable guidance and suggestions during the main-project.

Finally, I thank my parents and all my friends for their help, encouragement, and moral support given to me during this work.

Aravind Babu
